Android, .Net Core/Framework, Flutter, Node.js

Tools/VCS

Git, CI/CD, Gradle, Cargo

Other

Technical writing

PROJECTS

XClipper - Smart clipboard manager

([Website](#) / [Github](#))

- Clipboard manager for Windows & Android that helps to track clipboard activities and makes it easier to interact with them.
- It also helps to synchronize your clipboard between these two platforms.
- Developed with C# (WPF) for Windows app & Kotlin for Android app.

Moviesy - Client app for YTS

([Website](#) / [Github](#))

- An Android app to download & stream movies that are available as YTS torrents.
- Beautiful UI packed with lot of features including built-in torrent downloader, media player with chromecast support.
- Written with Kotlin following MVVM pattern.

Gear VPN - Fast, Free & Secure VPN

([Website](#) / [Github](#))

- A VPN app based on OpenVPN with one click connect & loads of servers to choose from.
- Written with Kotlin using Google's new declarative UI toolkit **Jetpack Compose**.

PROJECTS

Highlight Colors for Compose

([Website](#) / [Github](#))

- A plugin for IntelliJ based IDEs to draw color on editor's gutter represented by
`androidx.compose.ui.graphics.Color`

ADK - Android Reverse Engineering Kit

([Website](#))

- An IDE with complete suite of tools for reverse engineering Android apps, modifying custom ROMs, etc.
- This was my first big project I made when I was just starting to learn programming. Although the code is messy but it was big for me.
- Written with C# (Winform).

Others include [Kling](#), [aow](#), [git-open](#), [Iso2Usb](#), etc. on Github.

LIBRARIES

navigator - ([Github](#))

A small (Kotlin first) type-safe navigation library for Android to ease the use of fragment transactions, also available for Jetpack Compose for pure composable navigation.

EXPERIENCE

Android Developer

Khabri Audio Platform

📅 Dec 2021 - Present

Developing & working on end-to-end product features.

Android Developer

Freelance

📅 June 2019 - March 2021

Worked with several startups & did some contract work where I was responsible for making good quality products for my clients using the latest engineering best practices & idoms.

Indie Developer

Self employed

📅 May 2019 - Present

Developing, maintaining my commercial applications published on [Google Play](#) & other stores.
